PHILIPS

Introduction

Congratulations on your purchase and welcome to Philips!
To fully benefit from the support that Philips offers, register
your product at www.philips.com/welcome.

General description (Fig. 1)

1 Spray nozzle
2 Cap of filling opening
3 Steam control
- **CALC CLEAN** = Calc-Clean function
- ✂ = dry ironing
- **ECO** = optimal steam
- ☁ = maximum steam
- ☁ = turbo steam
4 Steam boost button (specific types only)
5 Spray button
6 Temperature dial
7 Temperature light
8 Mains cord
9 Type plate
10 Water tank with MAX water level indication
11 Soleplate

Important

Read this user manual carefully before you use the appliance and save it for
future reference.

Danger

- Never immerse the iron in water.

Warning

- Check if the voltage indicated on the appliance corresponds to the local
  mains voltage before you connect the appliance.
- Do not use the appliance if the plug, the mains cord or the appliance
  itself shows visible damage, or if the appliance has been dropped
  or leaks.
- If the mains cord is damaged, you must have it replaced by Philips, a
  service centre authorised by Philips or similarly qualified persons in
  order to avoid a hazard.
- Never leave the appliance unattended when it is connected to the mains.
- Always unplug the appliance from the socket outlet before you fill the
  water tank with water.
- This appliance is not intended for use by persons (including children)
  with reduced physical, sensory or mental capabilities, or lack of
  experience and knowledge, unless they have been given supervision or
  instruction concerning use of the appliance by a person responsible for
  their safety.
- Children should be supervised to ensure that they do not play with the
  appliance.
- Keep the appliance and its mains cord out of reach of children.
- Always place and use the iron on a stable, level and horizontal surface.
- Do not let the mains cord come into contact with the hot soleplate of
  the iron.
- **CAUTION: Hot surface** (Fig. 2)
Surfaces are liable to get hot during use (for irons with 'hot' symbol marked
on the appliance).

Caution

- Only connect the appliance to an earthed wall socket.
- Check the mains cord regularly for possible damage.
- Fully unwind the mains cord before you plug it in the wall socket.
- The soleplate of the iron can become extremely hot and may cause
  burns if touched.
- Descale the iron regularly according to the instructions in chapter
  'Cleaning and maintenance' in the user manual.
- When you have finished ironing, when you clean the appliance, when
  you fill or empty the water tank and also when you leave the iron even
  for a short while: set the steam control to the 'dry ironing' position, put
  the iron on its heel and remove the mains plug from the wall socket.
- Do not put perfume, vinegar, starch, descaling agents, ironing aids or
  other chemicals in the water tank.
- This appliance is intended for household use only.

Electromagnetic fields (EMF)

This Philips appliance complies with all standards regarding electromagnetic
fields (EMF). If handled properly and according to the instructions in this
user manual, the appliance is safe to use based on scientific evidence
available today.

Using the appliance

Filling the water tank

*Note: Your appliance has been designed to be used with tap water. If you live
in an area with very hard water, fast scale build-up may occur. In this case, it is
recommended to mix 50% distilled water and 50% tap water to prolong the
lifetime of your appliance.*

*Note: Do not put perfume, vinegar, starch, descaling agents, ironing aids,
chemically descaled water or other chemicals in the water tank.*

1 Set the steam control to position ✂ (dry ironing). (Fig. 3)

2 Fill the water tank up to the MAX indication (Fig. 4).

3 Close the cap of the filling opening.

Selecting temperature and steam setting

Table 1

Fabric type	Temperature setting	Steam setting	Steam boost	Spray
Linen	MAX	☁, ☁	Yes	Yes
Cotton	●●●	☁, ☁	Yes	Yes
Wool	●●	**ECO**	No	Yes
Silk	●	✂	No	No
Synthetic fabrics (e.g. acrylic, nylon, polyamide, polyester).	●	✂	No	No

*Note: As indicated in the table above, do not use steam or steam boost at a low
temperature, otherwise hot water may leak from the iron.*

1 Consult table 1 to set the temperature dial to the appropriate setting
for your garment (Fig. 5).

2 Put the iron on its heel and plug it in. The temperature light goes on
to indicate that the iron is heating up (Fig. 6).

3 When the temperature light goes out, the iron has reached the
correct temperature.

4 Consult table 1 to select a steam setting that corresponds to the
temperature you have set (Fig. 7).

*Note: To use turbo steam ☁, keep the steam control pressed to the turbo
steam position ☁ continuously.*

Features

Spray function

- Press the spray button to moisten the article to be ironed. This helps
  remove stubborn creases (Fig. 8).

Steam boost function (specific types only)

- Press and release the steam boost button for a powerful boost of steam
  to remove stubborn creases (Fig. 9).

Vertical steam (specific types only)

- You can use the steam boost function when you hold the iron in
  vertical position for removing creases from hanging clothes, curtains
  etc (Fig. 10).

ECO steam setting

- Select the **ECO** steam setting instead of the maximum steam setting
  ☁ to save energy, yet to achieve satisfactory ironing results. (Fig. 11)

Dry ironing

- Set the steam control to ✂ (dry ironing) to iron without steam. (Fig. 3)

Cleaning and maintenance

Cleaning

1 Set the steam control to ✂ (dry ironing), unplug the iron and let it
cool down. (Fig. 3)

2 Pour any remaining water out of the water tank.

3 Wipe flakes and any other deposits off the soleplate with a damp cloth and a non-abrasive (liquid) cleaning agent.

Caution: To keep the soleplate smooth, avoid hard contact with metal objects. Never use a scouring pad, vinegar or other chemicals to clean the soleplate.

Note: Regularly rinse the water tank with tap water. Empty the water tank after rinsing it.

Calc-Clean function

IMPORTANT: To prolong the lifetime of your appliance and to maintain good steaming performance, use the Calc-Clean function once every two weeks. If the water in your area is very hard (i.e. when flakes come out of the soleplate during ironing), use the Calc-Clean function more frequently.

1 Make sure the appliance is unplugged and the steam control is set to ✻ (dry ironing). (Fig. 3)

2 Fill the water tank to the MAX indication (Fig. 4).

Do not pour vinegar or other descaling agents into the water tank.

3 Plug in the iron and set the temperature dial to MAX (Fig. 12).

4 Unplug the iron when the temperature light goes out.

5 Hold the iron over the sink. Push the steam control to the Calc-Clean position and hold it (Fig. 13).

6 Gently shake the iron until all water in the water tank has been used up (Fig. 14).

Caution: While scale is flushed out, steam and boiling water also come out of the soleplate.

7 Set the steam control back to ✻ (dry ironing). (Fig. 3)

Note: Repeat the Calc-Clean process if the water that comes out of the iron still contains scale particles.

After the Calc-Clean process

1 Plug in the iron. Let the iron heat up to let the soleplate dry.

2 Unplug the iron when the temperature light goes out.

3 Move the iron gently over a piece of cloth to remove any water stains on the soleplate.

4 Let the iron cool down before you store it.

Storage

1 Unplug the iron and set the steam control to ✻ (dry ironing). (Fig. 3)

2 Wind the mains cord round the cord storage facility and store the iron on its heel (Fig. 15).

Environment

- Do not throw away the appliance with the normal household waste at the end of its life, but hand it in at an official collection point for recycling. By doing this, you help to preserve the environment (Fig. 16).

Guarantee and support

If you need information or support, please visit **www.philips.com/support** or read the separate worldwide guarantee leaflet.

Troubleshooting

This chapter summarises the most common problems you could encounter with the appliance. If you are unable to solve the problem with the information below, visit www.philips.com/support for a list of frequently asked questions or contact the Consumer Care Centre in your country (see the worldwide guarantee leaflet for contact details).

Problem	Possible cause	Solution
Water drips from the soleplate or wet spots appear on the garment during ironing.	The set temperature is too low for steam ironing.	Set an ironing temperature that is suitable for steam ironing. See table 1.
	You have put an additive in the water tank.	Rinse the water tank and do not put any additive in the water tank.
The steam boost function does not work properly (water leaks out of the soleplate).	You have used the steam boost function too often within a very short period.	Wait a while before you use the steam boost function again.
	You have used the steam boost function at a too low temperature.	Set an ironing temperature at which the steam boost function can be used (●●● to MAX).
Flakes and impurities come out of the soleplate during ironing.	Hard water forms flakes inside the soleplate.	Use the Calc-Clean function (see chapter 'Cleaning and maintenance', section 'Calc-Clean function').
Water drips from the soleplate after the iron has cooled down or has been stored.	You have put the iron in horizontal position while there was still water in the water tank.	Empty the water tank and set the steam control to position 'dry' after use. Store the iron on its heel.
Water leaks from the cap of the filling opening.	You have overfilled the water tank.	Do not fill the water tank beyond the MAX indication. Pour excess water out of the water tank.
When I push the steam control to the turbo steam position, the steam control jumps back.	You did not keep the steam control in the turbo steam position.	If you want to use turbo steam, you have to keep the steam control in the turbo steam position continuously. For other steam settings, this is not necessary.
